Preface

Mineral equilibria in mantle-derived rocks

This special issue includes articles resulting from the presentations at the symposium: “Mineral Equilibria in Mantle-Derived Rocks”, which took place on August 8–9, 2000 at the 31st International Geological Congress in Rio de Janeiro, Brazil, and was convened by Leonid L. Perchuk and Ciro T. Correia. The symposium was organized by the Working Group on Mineral Equilibria of the International Mineralogical Association.
